

Invited speakers and panelists

Prof. Keiichi TODA

DPRI, Kyoto University

Assoc. Prof. Dr. Sucharit Koontanakulvong

Chulalongkorn University

Dr. Sampan Silapanad

Western Digital (Thailand) Co.,Ltd.

Mr. Kimio Takeya

Visiting senior advisor, JICA

Mr. Thanes Veerasiri

Secretary General of Engineering
Institute of Thailand (EIT)

Mr. Vichai Santimahakullert

Director of General Insurance Association

Organizers : **Kyoto University and Kyoto Union Club (KUC)**
 Supporting Organizations : **Thai-Nichi Institute of Technology (TNI)**
 Supporting Project : **"Towards Sustainable Humanosphere
 in Southeast Asia" by CSEAS, Kyoto University**
 Date : Saturday 17th March, 2012, 8:30 am – 15:00 pm
 Place : The Twin Towers Hotel, Rama IV Road, Bangkok
 (Near Hualampong)

Pre-Registration Form

We encourage you to preregister with the form below and mail-in to KU-SEA Forum :

Title : Prof. / Dr. / Mr. / Ms. (delete as appropriate)

Name : _____

Institute/Organization/Company : _____

Post Address : _____

E-mail : _____

Tel : _____

Fax : _____

Date : _____

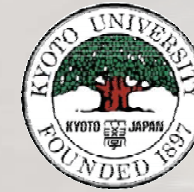

Signature : _____

*Note : Attendance Fee 500 Baht
 (Room, Lunch and Beverage)*

Floods

Lessons learned from experiences

Organized by
Kyoto University and Kyoto Union Club (KUC)

Supported by
Thai-Nichi Institute of Technology (TNI)

Supporting Project
**"Towards Sustainable Humanosphere
 in Southeast Asia" by CSEAS, Kyoto University**

The 10th Kyoto University Southeast Asia Forum 2012

Rationale

Recently numerous water disaster have devastated many regions of the world in rapid successions: Japan, China, Philippines, Vietnam and Thailand etc. Last year, Fukushima Tsunami and Bangkok 2011 Floods were samples of such frequent and serious disasters occurred.

Not only heavy physical damages (water gates, dyke, building, public infrastructure and industries etc.) are common-place in a severe water disaster but a multitude of people (*regardless of ages, genders, professions, social statuses*) also lose their lives or are maimed, suffering serious injury.

The questions are what we can learn from these:

- What is the probability of a big floods occurring in Thailand, including Bangkok, within the next 10 years?
- If and when such a big floods occurs in or near Bangkok, what areas are prone to be attacked? What might be the magnitude and scale of socio-economical casualties (deaths and serious injury) from residences and industries of all sizes?
- What about the functions of large dams or water reservoirs located nation-wide?
- Smart people learn from their experiences; the wise learn from the experiences of others. What are the main lessons we should learn from the various floods in the past?
- What to do and not to do when we encounter a floods again?
- Experiences from Japan can help mitigate the floods events ?

Seminar Program

The 10th Kyoto University Southeast Asia Forum 2012
FLOODS!

Lessons Learned from Experiences

Saturday 17th March, 2012.

Room: Kasatsuk 2, 4th Floor, The Twin Towers Hotel Bangkok

Organized by Kyoto University and Kyoto Union Club
