

ASEAN Research Platform Annual Meeting FY2017

CSEAS, Kyoto University

<Date> Feb 14, 2018

**<Venue> Mid-size meeting room, 3F, Inamori Foundation Memorial Hall
46 Shimoadachi-cho, Yoshida, Sakyo, Kyoto**

ASEAN Research Platform is an innovative transdisciplinary initiative, launched by CSEAS in 2017. The Platform aims to promote a dialogue between academic and non-academic stakeholders and encourage transformative research on the ASEAN region.

By bringing together scholars, scientists, engineers, and representatives from local government, business community and civil society in ASEAN and Japan, we forge new relationships and share insights as well as expertise to address specific issues and needs. Partnership with local researchers, practitioners and stakeholders is critical for the Platform in ensuring the relevance and sustainability of knowledge produced. In this annual meeting, we review the activities and progress of the past year and discuss focus and priorities of the Platform for the next fiscal year.

<Program>

Registration (9:45-)

Morning Coffee

Part 1: ASEAN Research Platform
